

## Sign Compliance Study

## Service Provided

MasterMind will drive each route inspecting all installed traffic signs for specification issues as well as recommending further installation. MasterMind will help to ensure your regulatory, warning, and school signs are all accurately placed where they are federally required. This survey will include work orders for each recommended traffic sign, suggesting the corrective measure.

Sign Compliance traffic sign recommendations include, but are not limited to:

- Stop Ahead Signs
- School Signs
- Speed Zones
- Railroad Signs
- Associated Bridge Signs (Markers & Clearance)

## Reports

- Route Listing Report
- Sign/Control Point Report
- Sign Compliance Summary
- Work Item Detail Report
- Work Summary

## Software

The Sign Compliance study is available with the MasterMind SignMaster™ software module. All sign information will be loaded into the SignMaster™ software upon delivery. This ensures all information to be concise and uniform throughout the study. Customizable reports can be generated with the SignMaster™ software module.

## Benefits

- Reduce the number of traffic incidents by placing recommended traffic signs
- Ensures your agency will adhere to multiple federal sign regulations
- Develop a budget based on accurate summary reports
- Recommended work items allow you to prioritize work, schedule maintenance crews, and quickly initiate field work
- Easy to read reports for efficient and prioritization of sign installation
- Alleviate lawsuits by being in compliance with FHWA regulations
